

Checklist to determine eligibility for an Aquatic Habitat Matching Grant:

- ☐ Are you an individual, a non-profit/community group or a business owner?
- ☐ Is your project located in the City of Seattle?
- ☐ Does your project provide a direct public benefit to aquatic habitat that has been directly affected by the City of Seattle's drainage system operation?
- ☐ Can you provide a 100% match to the grant amount requested with community, private resources, or non-city grants?
- ☐ Does your project **prioritize** and **protect** existing habitat from direct impacts from stormwater runoff through the City's drainage system?
- ☐ Does project work to **improve** habitat conditions that have been directly affected by the City's drainage system?

AND/OR

Does the project **correct** existing high-priority water quality and/or sediment quality problems associated with City stormwater discharges?

- ☐ Does the project **foster awareness** and **stewardship** of water quality and aquatic ecosystems as related to stormwater?
- ☐ Does the project **provide benefits** for **ecosystem processes**, with direct or indirect habitat implications for salmonids?
